Real Estate Website

Project Deliverables Report & Functional Workflow

Prepared for client review | Timeline: 1 week

1. Document Purpose

This report lists everything that I will be making and delivering to the client for the real estate website, and describes how each feature works as a visitor and admin workflow. It covers the feature set, main navigation, page-level functionality, enquiry handling, the admin dashboard, data structure, validations, the 1-week timeline and the final end-to-end system flow.

2. Scope of Deliverables

- Public website with the six-item main navigation (Home, Projects, About, Contact, EMI Calculator, Enquire Now).
- Advanced property search and filtering with dedicated property detail pages.
- Home-loan EMI calculator.
- Enquiry channels: property-specific Enquire Now, WhatsApp enquiry, Request Site Visit form and general contact form.
- Rich property content: floor plans, blueprints, carpet area, amenities, photo galleries, videos, interactive location maps, downloadable brochures, construction status and possession details.
- Admin dashboard (1 admin user) to manage properties, prices, images, brochures and project details without editing code.

3. Services Provided From My Side

- **Maintenance and technical support: 1 year service**
- **Backend support: 1 year**
- **SSL certificate: Included (for security)**
- **SEO: Search engine optimisation for visibility on Google search engine**
- **1 domain for 1 year**
- **Customized Emails**

4. Feature Comparison Table

The table compares each feature by what the visitor gets and what the client can control from the admin dashboard.

Feature	What the Visitor Gets	Client Control (Admin)
Advanced property search & filtering	Narrow listings by criteria such as location, type, budget, bedrooms and status	Filter values driven by property data entered in admin
Dedicated property detail pages	One full page per property with all project information	Create, edit, publish or unpublish each page

Feature	What the Visitor Gets	Client Control (Admin)
EMI calculator	Instant monthly EMI estimate for a home loan	Default values and ranges can be configured
Property-specific Enquire Now button	Enquiry form linked to the property being viewed; the enquiry also goes to WhatsApp	Enquiries arrive tagged with property name
WhatsApp enquiry integration	One-tap WhatsApp chat with a pre-filled property message	Business WhatsApp number managed centrally
Request Site Visit form	Book a preferred date and time to visit a project	Visit requests listed with status tracking
Floor plans, blueprints & carpet area	Layout drawings and area details per unit type	Upload and replace plans and area figures
Amenities, photo galleries & videos	Visual and facility overview of the project	Manage amenity list, images and video links
Interactive location maps	Map showing exact project location and surroundings	Set location per property
Downloadable brochures	PDF brochure download for offline reference	Upload and replace brochure files
Construction status & possession details	Current progress and expected possession date	Update status and dates as work progresses
Admin dashboard	Always up-to-date content on the website	Manage everything without editing code

5. Main Navigation Bar

Home | Projects | About | Contact | EMI Calculator | Enquire Now

Menu Item	Purpose
Home	Introduces the company and highlights featured properties.
Projects	Opens the property listing and search page.
About	Explains the company, its services and credibility.
Contact	Displays contact information and the general enquiry form.
EMI Calculator	Opens a dedicated home-loan EMI calculator.
Enquire Now	Directs users to the enquiry form or contact options. Enquiries also go to WhatsApp.

6. High-Level Website Workflow

The recommended visitor journey is:

Home → Featured Property / Projects → Search & Filter → Property Detail Page → EMI Calculation → Enquire Now / WhatsApp / Site Visit → Admin Follow-up → Site Visit

7. Module Structure

Module	Main Screens	Core Output
Home	Hero banner, featured properties, highlights	Brand introduction and entry to listings
Projects	Listing grid, search bar, filter panel	Searchable property catalogue
Property Detail	Overview, plans, gallery, map, status	Complete project information
About	Company story, services, credibility	Trust building
Contact	Contact details, general enquiry form	General enquiries
EMI Calculator	Loan inputs and result view	Monthly EMI estimate
Enquiries	Enquire Now, WhatsApp, Site Visit	Customer enquiries
Admin Dashboard	Properties, media, brochures, enquiries	Code-free content management

8. Projects Page: Search & Filtering Workflow

> **Open Projects → Enter keyword / choose filters → Results refresh → Sort → Open Property Detail Page**

- Advanced search by project name, location or keyword.
- Filters such as location, property type, budget range, bedrooms/configuration, carpet area and construction status.
- Each result card shows image, name, location, starting price, configuration and status, with a link to the detail page.
- Clear-all option and a friendly message when no properties match.
- Only properties marked Published in the admin dashboard appear in results.

9. Property Detail Page

Every property has a dedicated page. Content blocks appear in the following order:

Section	Content
Overview	Project name, location, developer, price range, configuration and key highlights.
Enquiry actions	Property-specific Enquire Now button, WhatsApp enquiry and Request Site Visit.
Floor plans & blueprints	Unit-wise floor plans and blueprints with carpet area for each type.
Photo gallery & videos	Project images and walkthrough or promotional videos.
Amenities	Icon-based list of project facilities.
Location map	Interactive map showing the project and surrounding landmarks.
Construction status & possession	Current progress stage and expected possession date.
Brochure	Downloadable PDF brochure.
EMI shortcut	Link to the EMI calculator, optionally pre-filled with the property price.

10. EMI Calculator Workflow

Enter Loan Amount → Interest Rate → Tenure → Calculate → View EMI, Total Interest and Total Payable → Enquire Now

EMI = P × r × (1 + r)^n ÷ ((1 + r)^n − 1), where P is the loan amount, r is the monthly interest rate (annual rate ÷ 12 ÷ 100) and n is the tenure in months.

- Inputs: loan amount, annual interest rate and loan tenure (years).
- Outputs: monthly EMI, total interest payable and total amount payable.
- Values update instantly as the user changes sliders or inputs.
- Available as a dedicated page from the main navigation.

11. Enquiry Workflow

Channel	User Action	System Action
Enquire Now (property-specific)	Fills name, phone, email and message on a property page	Saves the enquiry tagged with the property and sends it to WhatsApp
Enquire Now (main navigation)	Clicks Enquire Now in the navigation bar and submits the form	Saves the enquiry and sends it to WhatsApp
WhatsApp enquiry	Taps the WhatsApp button	Opens WhatsApp with a pre-filled message naming the property
Request Site Visit	Submits name, phone, property, preferred date and time	Creates a site visit request with status Pending
General contact form	Submits a general query from the Contact page	Saves as General Enquiry and notifies admin

Form validations

- Name and a valid phone number are mandatory; email format is checked where provided.
- Site visit date cannot be in the past.
- Spam protection (CAPTCHA or honeypot) on all forms.
- On submit, the user sees a confirmation message.

12. Enquiry Management Workflow

New → Contacted → Site Visit Scheduled → Visited → Closed

- Every enquiry and site visit request is stored with source, property, date and contact details.
- Admin can update status, add notes and filter enquiries by property, source or status.
- Admin is notified of each new enquiry by email and on WhatsApp.

13. Admin Dashboard

One admin user will be created for the client. The admin dashboard lets the client manage properties, prices, images, brochures and project details without editing code.

Admin Function	What the Admin Can Do
Property management	Add, edit, publish, unpublish or delete properties and mark featured ones for the home page.

Admin Function	What the Admin Can Do
Price management	Update starting price, price per unit type and price ranges.
Image & gallery management	Upload, reorder and remove photos; add video links.
Brochure management	Upload or replace downloadable brochures.
Project details	Edit description, amenities, floor plans, carpet area, location and map pin.
Construction & possession	Update construction status and possession date.
Enquiry view	View, filter and update enquiries and site visit requests.
Site settings	Manage contact details, WhatsApp number and About page content.
Admin access	Single admin user with secure login.

14. Key Data Entities

- Property: name, slug, location, type, price, status, featured flag, description, possession date.
- Unit Type: belongs to a property; configuration, carpet area, price, floor plan file.
- Media: images and videos linked to a property, with display order.
- Amenity: master list linked to properties.
- Brochure: file linked to a property.
- Enquiry: name, phone, email, message, source, property and status.
- Site Visit Request: contact details, property, preferred date/time and status.
- Admin User: one login account.

15. Important Business Rules & Validations

- Only published properties are visible on the public website.
- Every property must have a name, location, price and at least one image before publishing.
- Uploaded files are restricted by type (images, video, PDF) and size.
- Admin area is protected by login and the SSL certificate secures all traffic.
- The site is responsive across mobile, tablet and desktop.
- Pages are search-engine friendly, with clean URLs and meta titles per property.
- Contact numbers and WhatsApp links work from a single configurable setting.

16. Development Timeline (1 Week)

The whole project will be completed in 1 week, planned day by day:

Day	Scope	Priority
Day 1	Design, layout, navigation bar, Home, About and Contact pages	High
Day 2	Property data model, admin login (1 admin user) and property management	High
Day 3	Projects listing, search and filters, property detail pages	High
Day 4	Floor plans, gallery, videos, amenities, maps, brochures, construction status	High

Day	Scope	Priority
Day 5	EMI calculator, Enquire Now with WhatsApp, WhatsApp enquiry, Site Visit form	High
Day 6	SEO setup, domain and SSL setup, testing and fixes	High
Day 7	Deployment, admin walkthrough and handover	High

17. End-to-End Example

1) A visitor lands on Home, sees a featured property and opens Projects.

2) They filter by location and budget and open a property detail page.

3) They review floor plans, carpet area, gallery, amenities, map and possession status, and download the brochure.

4) They use the EMI calculator to check affordability.

5) They tap Enquire Now, WhatsApp enquiry or Request Site Visit. The enquiry reaches the client on WhatsApp and in the admin dashboard.

6) The admin follows up and updates the enquiry status. As the project progresses, the admin updates construction status and prices from the dashboard with no code changes.

18. Final Recommended System Flow

> **ADMIN SETUP: Login → Add Property → Prices → Images/Videos → Floor Plans → Amenities → Map → Brochure → Construction Status → Publish**
>
> **VISITOR: Home → Projects → Search & Filter → Property Detail → EMI Calculator**
>
> **ENQUIRY: Enquire Now / WhatsApp / Request Site Visit / Contact Form → Sent to WhatsApp and Admin Dashboard**
>
> **FOLLOW-UP: Enquiry Review → Contact → Site Visit**
